**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Election/Restrictions***

Applicant has argued in the restriction requirement that it is too restrictive and that there is no burden placed on the examiner on searching all of the groups and encompassed inventions therein. It is noted that the invention encompasses many different compounds which are too numerous for the examiner to search all of them. The compounds vary distinctly in their structures and functions. Thus, an individual search is required of each individual component. Therefore, as part of the election on the record applicant's election is an election of the compound to be examined and the search and examination on the merits will be restricted to that specific compound (the compound of claim 13) since searching any and all compounds encompassed by "lysosomal modulating compound" are simply too numerous for the examiner to search which does create a serious burden upon the examiner. This requirement is an election of a single invention, since each compound is assumed to be a patentably distinct invention, in the absence of evidence to the contrary.

Claims 10-19 remain withdrawn from consideration as being drawn to a non-elected invention.

The requirement is proper and is made FINAL.

***Claim Rejections - 35 USC § 112***

Art Unit: 1654

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 9-14 and 24 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The claims are not enabled for treating Alzheimer's, Parkinson's or lysosomal disorders. There is no known cure for Alzheimer's or Parkinson's thus treating is also not known. No known treatment can keep the disorders from happening. In fact, many people in the United States alone have such ailments and never get any better. The evidence on the record does not show that one who has such ailments ever gets any better, so how can one claim such treatments when they do not do what they claim they do ? Without scientific data showing that the diseases are prevented or cured then treatment of the diseases is just as unknown since patients with such diseases never get any better.

As far as "lysosomal storage disorders" go, they also are not enabled and cannot be determined as to what they would do. Applicant has claimed two specific disorders (Alzheimer's and Parkinson's) but it is not clear what would encompass "lysosomal storage disorders". Without more the claims are simply not enabled by the specification.

Claims 9-14 and 24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is not clear what is meant by the term, "lysosomal storage disorders". What exactly is applicant claiming ? Applicant has claimed two specific disorders (Alzheimer's and Parkinson's) but it is not clear what would encompass "lysosomal storage disorders". The specification teaches Alzheimer's and Parkinson's which are known terms of art but not what "lysosomal storage disorders" would meant in the art.
